# Chapter 1

## Préambule

Ce livre contient l'ensemble du matériel (contenus, exemples, exercices...) nécessaire à la réalisation des travaux pratiques de biométrie 2.

# Introduction

You can label chapter and section titles using `#####` after them, e.g., we can reference Chapter 2. If you do not manually label them, there will be automatic labels anyway, e.g., Chapter ??.

Figures and tables with captions will be placed in `figure` and `table` environments, respectively.

```
library(tibble, rnorm, rnorm,
        ggplot2, aes, geom_point)
```

Figure 2.1: Here is a nice figure!

Reference a figure by its code chunk label with the `fig` prefix, e.g., see Figure 2.1. Similarly, you can reference tables generated from `tbl` code chunks, e.g., see Table 2.1.

```

::kable
head

```

You can write citations, too. For example, we are using the **bookdown** package (Xie, 2018) in this sample book, which was built on top of R Markdown and **knitr** (Xie, 2015).

Table 2.1: Here is a nice table!
